

## Call for research proposals for dental research

Region Stockholm and Karolinska Institutet (KI) have the common goal of improving dental care in the Stockholm County through research and development. The steering group KI / Region Stockholm for dental research (SOF) announces funding for clinical dental research.

This call includes funding within the following categories

- Project funding
- Project funding for junior researchers

### ***Project funding***

Applications are welcome for clinically oriented projects in all areas of dentistry and are intended for research carried out within the region. The projects, which should target needs in dental care, require collaboration between the Department of Dental Medicine (DentMed), KI and other dental care providers within Stockholm County. The projects should be of a larger nature and address comprehensive issues where care needs to be developed such as orofacial disease (pathogenesis, prevention, prognosis, diagnostics, effects of rehabilitation), linking orofacial health and general health, epidemiology, geriatric dentistry, treatment research (based on SBU's and the National guidelines for Adult Dental Care's knowledge gaps) and health economics. Projects that collaborate with strong research environments are given priority, as are projects that involve doctoral students and/or postdocs.

The main applicant must have a doctoral degree and be principal investigator (PI) for a project group that includes researchers from both Dentmed and other dental care providers in Stockholm County. Co-applicant(s) is the person or persons who, together with the PI, are responsible for the planning and implementation of the project. All co-applicants must contribute scientifically and give their approval to be included in the application. The project group and the roles of the various co-applicants must be clearly described.

Funding can be applied for, for a period of up to three years. The allocation period for approved funding is each calendar year for which funding has been approved. Approved funding will be available as of January 1<sup>st</sup> for the indicated year and must be used within the year.

The grant covers project-related costs, such as salaries, travel (including stays at research facilities), publishing costs, small equipment.

2.5 million SEK is available per year and the maximum possible amount to apply for and to receive is 500 000 SEK per year.

### ***Project funding for junior researchers***

In addition to project funding SOF has dedicated funding to one-year projects targeting junior researchers. A junior researcher is defined as a person that has defended his/her PhD thesis within the last 10 years, i.e. after January 1<sup>st</sup> 2013 and before December 31 2022. The applicant may apply for funding before the PhD defence, but funding will only be allocated if the successful defence occurs no later than December 31, 2022. Time for sick leave, parental leave, postgraduate training (ST) etc. may be deducted. The project should be clinically oriented and meet the same conditions as described for project funding above.

0.95 million SEK is available and the maximum possible amount to receive is 250 000 SEK.

For more information, please contact Professor Bodil Lund, Karolinska Institutet. [bodil.lund@ki.se](mailto:bodil.lund@ki.se)

## Application rules

**The application should be written in English** since the review panel is international.

The application should be done in the online application system [Researchweb](#).

The application period starts April 1<sup>st</sup>, 2022 and the complete application must have been submitted no later than May 31, 2022 at 24:00. Applications received later than this will not be considered. The decision to allocate funding will be made during September 2022.

Incomplete applications will not be considered. Complementary information submitted after the final submission date will not be considered.

You may only register one application for project funding as PI and may only have one ongoing SOF-funded project. But you may be a co-applicant for several applications for project funding.

Junior researchers can choose application type, but only register one application.

It is important to fulfil the conditions for the applied funding. You must also follow the instructions. Failure to do so may be taken into consideration when assessing your application.

Applications to the Ethics Committee must be approved before granted funding can be disbursed.

## Instructions

### *Register the application*

- Register your application at [Researchweb](#).
- If you don't already have an account, you need to start by registering one:
  - Click at "Logga in" at top right hand corner. Select "New user" and follow further instructions.
  - Complete your CV
  - Tips: Change language to "English" (on top panel). Otherwise, some fields are shown with Swedish headings.
- Complete instructions for the call are shown and can be downloaded on the start page under "News". Click on "Ansök här" to create a new application, then choose Application form SOF project 2023-2025.
- A page with information about the call is shown. Here you can download the complete instructions as well. Proceed.
- Choose between **project funding** or **project funding for junior researchers**.
- Fill out the form to create your application. You are the main applicant (project leader).

### *Basic information*

- **Date for PhD defence:** Enter the date, month and year for your PhD defence or planned date.
- **Project title:** Must provide adequate information as to the nature of the project even for a non-specialist.
- **Applicant's affiliation and address:** Enter details of the division/unit/clinic or equivalent where the project will be conducted. Include postal address.

- **Requested for project grant:** Fill in this field when you have completed the budget. Maximum possible amount to apply for is 500 000 SEK per year for project funding and 250 000 SEK for project funding for junior researchers (only for 2023).
- **Ethical vetting:** Indicate if ethical vetting is approved or planned. Provide registration number if approved.
- **Approval by head of unit/clinic:** Verify/indicate that the relevant head of department/clinical director (or equivalent) have approved the application. Fill in the name of the head.

**A. Research program (max 26 500 characters in total)**

- **Project summary** (max 2500 characters): The scientific summary of the research program should give a brief outline of the purpose of the research and its implementation. Please write the summary so that people from other research fields can also understand it.
- **Purpose and aim:** Present the overall aim for the project and the hypotheses to be tested.
- **Background:** Describe your own and your co-applicants' research and previous findings in the field.
- **Project description:** Present the design of the project, choice of method, the data to be used, how this data is to be collected and the principles and methods that will be used to process and analyse it. Specify a general timetable for the project.
- **Significance:** Describe the significance of the anticipated results for the patients and the society as well as the clinical relevance. How will knowledge generated within the project be implemented in the health service? How applicable are the findings and how will your scientific findings be transferred into clinical practice? Does the design of the project allow conclusions to be drawn that are applicable to a broader patient population than the one studied as part of the project? Can the findings be applied to clinically demarcated areas/diseases?
- **Preliminary results:** Present your own trials, any preliminary work and preliminary findings in the field. Your application should clearly indicate whether the project is based on previously completed projects and provide a description of how they are connected.
- **References.** Give key references relevant to the research project/application.

**B. Collaboration with other caregivers and patients (max 2000 characters for each)**

- Describe the research group and the planned collaboration between the Department of Dental Medicine and other caregivers within Stockholm County. Describe the role/function of each person in the project (name, occupation, workplace and position/job). In what way is the participants' scientific competence explored?
- SOF promotes patients' perspective in research. Describe how user involvement/patient representation/patient research partner is planned to be included in the project.

**C. Budget and other resources**

- **Budget:** Complete the budget for the project. Salary costs should include employee benefits (LKP). Specify the costs. Separate between costs for the main applicant's (project leader) institution and the co-applicant's institution. Sum the total costs/year and calculate INDI (18.22%). The sum for each year is automatically calculated. Transfer the sum to the first page. State also the total costs for the project.
- **Resources:** Click on "Redigera bidragsgivare" to choose other sources of funding (from you CV) during the last five years.
- **Motivation of budget:** Shortly motivate the posts in the budget.

**D. Research environment/infrastructure**

- Provide a brief description of the research environment/infrastructure where the project is to be carried out.

**CV for main applicant/project leader**

Short CV with the following information:

- Educations and academic titles
  - University degree, University, year
  - Specialist competence, year, field
  - PhD degree, year, university, title of dissertation, supervisor
  - Postdoc- and research appointments, year and posting
  - Associate professor (docent), year, university, subject
- Current employment, duration of commission, percentage of research in position, any combined posts
- Supervisor assignments, ongoing and concluded
- Time deducted from research
- Other information relevant the application
- Publications. Total number of peer-reviewed original articles January 1, 2017 to March 31, 2022, Review articles/book chapters January 1, 2017 to March 31, 2022.

This information will be retrieved from your CV. If you have your CV in Swedish, it can be edited into English here. Note that this will also change your CV in the system.

**Co-applicants', their CVs and scientific qualifications**

- Click on "Edit coworker" and then on "Add coworker"
- Search for coworkers by their email address. Or add coworkers already in your list. When added they will receive an invitation to accept participation.
- The co-applicants must have a personal account within the system to be able to be listed as co-applicant. If they have not, ask them to open one.
- When the coworker has accepted the invitation, he/she should provide brief information on his/her qualifications in the CV (same details as for the PI). This can also be done by you as main applicant.
- List the five most important and relevant peer-reviewed original research papers/articles for the application, published between 2012 and 2022.

**The review process**

Disqualification rules, in accordance with Karolinska Institutet's [Guidelines for Conflicts of interest](#) will be applied when applications are being processed and prioritised to guarantee objective and impartial assessment.

The application is evaluated by external reviewers. The group is led by a chairman who compile the results and rank the applicants. The SOF steering group makes the decision about funding. The review group can call in further reviewers if they believe that they have insufficient competence to review an application.

The external reviewers evaluate the project's 1) originality, 2) methodology, 3) significance, 4) the competence of the applicants, and 5) research environment according to a scale 1-7, and 6) feasibility according to a scale 1-3. Finally, the overall quality of the project is scored 1-7. The

reviewers are requested to evaluate the whole project group's competence and not only the main applicant's merit when evaluating the application.

The mean score for each reviewer for the items 1 to 6 is calculated as a total score. The score is multiplied with a factor 1.x where x is the score for the overall quality. After this the median score of all reviewers is calculated as total score for the applicant. The median score of the reviewers is used as their scores often deviate. An extra point is finally added for junior applicants (up to 10 years after dissertation).

Finally, the applicants are ranked according to the total score.

## **Time plan 2022**

Application period starts	April 1
Last day to apply	May 31
Preview of applications	June 7
External review	June 15 to August 15
Compilation of reviews	August 31
Decision by SOF steering group	September

## **Technical assistance**

Technical assistance is given **until 16.00 May 31**
